**Lectures:** Library Downstairs Classroom: Wednesday/Friday 11:30am-12:20pm

**My Goals:** By the end of the semester, I hope to teach you:

1. To have a better understanding of some fundamental concepts in various branches of computer science and computer technology
2. To further develop some basic computer skills: using applications, making web pages.
3. To appreciate the historical and conceptual development of computer science and computer technology by studying some broad aspects of its history.
4. To gain insight into how some questions of technology interact with philosophy and theology, as well as some other disciplines such as art and mathematics.
5. To become comfortable in your ability to use technology and to learn on your own.

#### Grading Criteria

18% Weekly Reading Questions (9 weeks, 2% each)  
40% Assignments (8 Assignments, about 5% each)  
20% Test 1 – Midterm – October 6  
22% Test 2 – Final Exam – Monday, December 11, 12:30pm-2:30pm

You cannot turn in the Weekly Reading Questions late. If you must miss class, email me the answers or send them with someone else. There will be a penalty for turning in the Assignments late, (and a maximum of 1 week late allowed).

#### Required Text:

*Computer Confluence, 7<sup>th</sup> Edition* George Beekman, Michael J. Quinn.

**Academic Integrity:** Plagiarism is the act of presenting someone else’s ideas and work as your own. It ranges from not citing the sources of ideas and textual excerpts to turning in an essay written by someone else. Plagiarism at Biola is not tolerated, and may result in failing the assignment or the course and further discipline by university officials.

**Students with Disabilities:** Students desiring accommodations for this class on the basis of physical, learning or psychological disability are to contact the Office of Disability Services. The Office of Disability Services is located in the Student Services Building and can be reached at ext. 5851.
